## Intro

## **Listen and Discuss**

Read the texts below and match each one with the correct heading. Write in the blank. Technology **Unusual Buildings** Ecotourism TV Around the World Working Days Going Green

The paper vs. eBook debate, which has been going on for several years, does not seem to serve any real purpose. Digital has become an integral part of life; so much so, that we fail to notice it. Hard copies, on the other hand, are still available, but for how long?

The Makkah Clock Royal Tower is among the top tallest buildings in the world. The clock face is large enough to be seen from 25 kilometers away. Have you seen it?

Ecotourism allows travelers to observe and experience life and culture in a natural and often undisturbed location that lends itself to activities like hiking, climbing, rafting etc. This type of tourism often provides funds for conservation and contributes to the development of the local economy. Would you be interested in this type of travel?

Cable television is gradually being replaced by the Internet. Recent research indicates that a substantial number of cable subscribers in their late twenties to mid-thirties are planning to discontinue their cable TV subscriptions. On-demand viewing appeals a lot more to people who want to watch a show of their choice at a time that suits them best. What is your view?

It is not unusual for working people to complain about having to follow the same routine day in and day out. Come retirement time, however, a great number of them feel lost and suffer physically and psychologically through the absence of the same routine. Why do you think this happens?

Climate change has been a critical issue in recent years due to its destructive consequences caused by natural disasters, such as, storms, hurricanes, flooding and landslides. Deciding to "go green" has presented a dilemma for countries which have to choose between immediate economic growth and greener policies. This has delayed timely action and prevented the implementation of "green" measures that can contribute to the reduction of carbon emissions. What is your view?

**Librarian:** Can I help you?

Hashim: Could you please tell me where I can find

biology books and research documents?

Librarian: What exactly are you looking for?

Hashim: It's about a science project and I need to

gather information, in order to create a

timeline for biological research over the last 60

years or so.

Librarian: I see. That must be interesting. It can't be easy

> to collect all the information and choose the key items you need but I'm sure you'll manage.

Go to aisle 5 and look up the biology section. I'm sure you'll find what you need.

Hashim: I hope so. Thanks for your help.

Librarian: One more thing! The research documents are in the reference section. You have to sign and

get a key. You can look up what you need and read documents in the reference section, but

you mustn't take anything out.

Hashim: Can I photocopy any pages?

You'll have to check with me first. You are not allowed to photocopy old manuscripts. Librarian:

Hashim: I understand. Thanks again.

(an hour later)

Ali: I've noticed you have to use a whole pile of books. Are you doing research?

Hashim: Yes, I'm trying to. But I'm not sure I can do it within the deadline. I'll need to spend days in the

library, reading and making notes.

Ali: Don't you worry! Of course you'll make it. It seems impossible at first but you get used to it.

Would searching online or using eBooks help?

Hashim: That would be awesome but all the computers are taken.

Ali: No, not really. How about using this one? I'm just about to leave.

Hashim: Are vou sure?

Ali: Absolutely. I'll let the librarian know on my way out. You'd better

move over right away, before someone else takes it. Here, I'll help

you move your things.

Hashim: Thanks a lot. I owe you big time!

Not, at all. I'm sure you'd do the same! Ali:

a break every hour.

Imad: I'd never get to the end of it that way.

## **Listen and Discuss**

Read the Internet profiles of the three teenagers. Find two important details about each.

I believe in living life to the fullest. My friends call me "adventure boy" because I'm very spontaneous and I love to do new things. There's almost nothing I won't try once. For example, I've gone bungee jumping and parachuting! I've eaten shark fin soup and chocolate covered crickets! I like to set challenges for myself, and I've found that I can do anything I set my mind to. I'm also a very straightforward person. I say what I mean and I mean what I say. If you ask my advice, you're going to get it!

Name: Luke Mitchell Gender: Male

Age: 17 Home: London, England

OK. So the first thing you should know about me is that I'm obsessed with technology and media. I have to be "plugged in" all the time. I spend hours each day on the Web and playing computer games. I'm a lot like my dad. He's a software engineer and he loves technology and spending time on the computer, too. It drives my mom crazy.

But just because I love technology doesn't mean I'm a loner. I'm always hanging out with my friends. Sometimes I spend hours talking with friends online. I'm a pretty funny guy and I like cracking people up. My approach to life is laid back. I like helping others lighten up and not take life so seriously.

Name: Ahmed Al Ali Age: 22

If I had to describe myself with one phrase it would be "down to earth." I also love being outdoors. Being in nature makes me feel peaceful and happy. I especially love the quiet of morning. One of my favorite things to do is wake up really early and go for a long hike.

I'm not always quiet, though. I have a few very close friends, and we spend hours talking and laughing. My family and friends mean everything to me, and they know that they can depend on me for anything. I'm a good listener. I'm not the type of person who tells people what they should do when they have a problem. Instead, I give lots of support and encouragement.

## AMAZING INTERNET CONNECTIONS

We all use the Internet to connect with people. Using email, social networking sites, and instant messaging are ordinary ways that people connect. But at times, the Internet has been used to connect ordinary people in extraordinary ways.

12-year-old Sean Redden from Denton, Texas, was in on the Internet, playing a cyber fantasy world game. Suddenly someone came online, asking for help. The person said she was a Finnish business student who was locked in her college's computer lab. She said she was having an asthma attack and couldn't breathe.

Redden wasn't sure if this was part of the game as sometimes a few people lie on the Net. However, as he later told the *Dallas Morning News*, he decided it was, "too real to be a joke." So Redden called the police. With the additional help of international phone operators, Finnish paramedics found 20-year-old Tara Laintinen and gave her the medical attention she needed. Without the Internet and the efforts of a 12-year-old boy half a world away, she might not have survived.

## FINDING YOUR DOUBLE

It was just an ordinary night on a crowded subway car for Patrick Swales, a 21-year old web designer in New York City. The car had just stopped at a station and the doors opened. Suddenly, he saw himself waiting at the platform. But the clothes were not really his style. What was he doing waiting there? He should be in the car. But he was in the car! By the time he realized that he had just run into his double, the doors had shut and they were moving. At that instant, their eyes met. Disbelief, amusement, wonder were all conveyed in that one look! They both raised a hand in an attempt to catch each other but it was too late.

Shaken by the encounter and determined to find his double, Patrick came up with a unique idea. He created a website called subwaymydouble.com. He posted his own photo and a description of the man he had seen in the subway, in the hope that someone would see it and make contact. He got the call two days later.

Now Patrick and his double are best friends. His name is Manuel and he is in New York studying web design! Patrick and Manuel have decided to take themselves out of the public eye, so they have stopped updating the site. Patrick posted this message on the website: "In our best interest, there will be no more updates to this website. Unlike popular TV series, you will have to continue the story yourselves. Best wishes to all and may you find your double some day."

# REUNITED 60 YEARS

Asma, a 75-year-old grandmother of eight, enjoyed telling her grandchildren stories about her youth. These stories usually featured Sabah, Asma's best childhood friend. Asma and Sabah had been as close as sisters. Then, when the girls were 15, Sabah's family moved away and the girls lost contact. But Asma never forgot her childhood friend.

One day, Asma was telling her 13-year-old grandchild, Khan, a story about Sabah, when Khan asked, "Why don't you try to find her?" Khan got out his laptop and showed Asma how to surf the Web. A mere 30 minutes later, they had found Sabah! Asma's hands trembled as she dialed her old friend's phone number. When Sabah answered and Asma identified herself, Sabah burst into tears. By coincidence, Sabah was now living nearby.

Sixty years later, the women are inseparable once again. "My life has improved dramatically since Asma found me," says Sabah. "I never feel lonely anymore." Adds Asma, "It's as if we had never been apart. Sixty years have made no difference to our friendship!"

These are just a few of the incredible ways people have been brought together by the Internet. Every day there are more. Who knows what amazing Internet stories are unfolding at this very moment.

# Learning Face-to-Face and Online

There have been significant changes in education due to technology. The Internet has played a determining role in transforming the face of education as we used to know it. More and more universities and colleges offer F2F (Face-to-face) and Online course modes or blended versions that combine classroom F2F and email, social networking, or synchronous e-learning.

Research has shown that students choose different options, depending on individual preferences, learning styles, and practical considerations. For example, working adult students prefer online courses as they offer the flexibility that they need to combine learning with work. In other words, individuals, whose time and/or mobility are restricted, are happier with online courses.

On the other hand, a large number of students enroll in F2F courses as they feel that face-to-face

instruction and communication with peers will help them understand concepts better and learn more effectively. They are not opposed to using email or social networks to communicate with peers but not with their instructor. On the contrary, online students find it easier to communicate with instructors by email as it frees them of inhibitions they might have about asking questions or raising issues face-to-face.

Both groups defend their respective choice wholeheartedly. This is further demonstrated by success rates and learning outcomes. So, given a positive attitude to technology and the necessary skills, students will benefit from online courses as much as their counterparts in face-to-face contexts. What remains to be seen is if such courses will also benefit interpersonal skills and help people perform as members of a team.

**B.** Study the charts below. What is the topic for discussion shown in both?

## 3 Grammar 📜

#### **The Passive**

Use the passive to put the focus on an action, rather than who did the action. The passive is formed with be (any tense) + past participle.

The crime was committed early in the morning.

The murder weapon has been found.

The murderer will be brought to justice.

To include who did the action, use the preposition by.

The burglar was arrested by the police.

#### **Past Perfect and Past Perfect Progressive**

We use the past perfect to talk about an activity or event that was completed before another activity or event in the past.

Reiko had forgotten to lock the door before she left the house.

The criminal **had** already **escaped** by the time the police arrived.

We use the past perfect progressive when the activity was in progress at the time another activity or event happened in the past.

Juan had been getting cash from the ATM when he was mugged.

The driver had been swerving between lanes when the police officer stopped him.

## 4 Conversation

**Albert:** When traveling in cities, I used to worry

about being pickpocketed. Then I learned how pickpockets do it. That taught me how to prevent it from happening to me.

**Ali:** So how do they do it?

**Albert:** Well, to begin with, they look for someone

on the street who has stopped to look at buildings or people. That's one of the reasons tourists are an easy mark.

**Ali:** Then what happens?

**Albert:** The pickpocket will often pretend to bump

into the victim by accident. He might act as if he's dizzy. He may ask where you're from, act really friendly, and try to shake your hand.

**Ali:** Then what?

**Albert:** At this point, he might pretend to lose his

balance and fall against you. Like this (falling

over).

**Ali:** Then what?

Albert: That's it. You've let your guard down, and

consequently, he's nabbed your wallet.

**Ali:** Are you kidding? Come on. My wallet

couldn't possibly be stolen that easily.

**Albert:** Are you sure?

**Ali:** I'm positive.

**Albert:** Then what's this in my hand?

**Ali:** My wallet!

#### The Case of the Stolen Jewels

Detective Colmes was at the coffee shop around the corner when he learned that Jones's Jewelry had been broken into. He arrived at the scene of the burglary in moments.

Mr. Jones, the owner of the store, explained what had happened. "I arrived this morning to open up the store. As I walked up to my shop, I noticed a lot of broken glass on the pavement. I looked up and realized that the display window had been broken." Colmes looked out the broken window at the sidewalk, littered with glass. Mr. Jones continued, "Then I saw that all of the jewelry from the display window was gone. The doors were still locked, so this must be where the burglar broke in!"

"Why didn't the alarm go off?" asked Colmes. "It's a strange coincidence," said

Colmes looked around at the empty jewelry cases. "I assume your jewelry was insured?"

"Of course!" said Mr. Jones. "Thank goodness for that!"

Colmes nodded and said, "Mr. Jones, I believe there was a crime indeed. And it was committed by you."

What crime does Colmes suspect Mr. Jones of committing? Why?

The Center Street Bowling Alley, the oldest bowling alley in the city, closed at midnight. At 4:00 A.M., the janitor found a terrible sight: a man with a knife in his back lying in one of the lanes. Detective Colmes quickly arrived at the scene with a swarm of police officers.

"Anybody know the victim?" asked Colmes. "I do," said one of the officers. "That's Bob Reynolds. He's running for councilman. He and Mike Jenner have been having a bitter campaign battle."

"Perhaps we should pay Mr. Jenner a visit," said Colmes. Before leaving the bowling alley, Colmes took his cell phone out of his pocket and left it behind.

On arriving at Mike Jenner's house, Colmes told Jenner, "I have some grim news. Bob Reynolds has been murdered."

"No! I can't believe it!" cried Jenner.

"We'd like to speak with you about the murder. But first, I need to get back to the police station to file the report. Can you meet me at the station?"

"Of course. I'll help in any way I can."

"I'll give you a call." Colmes patted his pocket. "Uh oh, I must've left my cell phone at the bowling alley. Would you mind picking it up and bringing it with you to the station?"

Jenner looked confused, but said, "Sure. I'll do anything to help with the investigation."

Later that day, Jenner brought Colmes's cell phone to the station. He was arrested and charged with murder. Why?

#### Answer

#### The Case of the Stolen Jewels:

Detective Colmes suspects that Mr. Jones took the jewelry himself and pretended that there had been a burglary so he could collect insurance money. The broken window is Colmes's clue. If someone had broken into the shop, the broken glass should have been on the inside of the shop. Since it was outside the store, the window must have been broken from inside.

#### **Answer**

#### The Case of the Bowling Alley Murder:

Detective Colmes never told Mr. Jenner in which bowling alley the murder took place. Yet Mr. Jenner knew which bowling alley to go to for Colmes's phone. Mr. Jenner must have known where the murder took place because he was there!

#### **After Reading**

Answer true or false.

- **1.** Detective Colmes was at the police station when he heard about the robbery.
- **2.** \_\_\_\_\_ The broken glass was inside the store.
- **3.** \_\_\_\_\_ The Center Street Bowling Alley is the only bowling alley in the city.

- 4. How many past forms can you find?
- **5.** Are there any passive forms? Why? Why not?

A burglar was arrested after leaving his cell phone at the house that he broke into. The man was going through the rooms, looking for valuables, when he heard someone unlock the door and enter the house. So, he jumped out of a window and fled to avoid getting caught.

The police searched the house later, looking for prints and other clues to help them identify the man. All of a sudden, one of the owners pointed to a cell phone plugged into one of the sockets, charging, and said that

he had never seen it before and did not know who it belonged to. The police checked with the rest of the family and confirmed that it did not belong to any of them.

One of the police officers had an idea. He called a contact listed in the phone memory, and told the person that the owner of the phone had been in an accident, so the police were trying to get in touch with friends and family. The man was identified. He was later arrested and charged with a total of 12 burglaries!

- **B. 1.** Write a story for a newspaper or web article describing a crime. Choose a real or imagined crime. The crime should be a foolish, non-violent one.

#### **Writing Corner**

When you write an article, a story for a newspaper or magazine:

- open with an account of an event that has happened recently; if a reader is attracted by the first few lines, they are more likely to read the whole story.
- notice that articles which provide the account of an event do not usually present things in natural order (chronologically); Use a variety of verb tenses to jump back and forth in past time: What happened? What had happened?; What was going to happen (but probably didn't)?; What has happened?
- use time markers to help your reader follow the order of events in the narrative: Before...; Later that day ...; Soon after...; When ...., While ...., and so on.
- bear in mind that such articles are usually quite 'dense', i.e. they contain a lot of information in little space

#### **Past Progressive**

We use the past progressive when we describe what was happening at a specific time in the past.

**Q:** What were you doing at three o'clock today? **A:** I was driving home from work.

We use the past progressive when we talk about a temporary state or action.

**Q:** Have you always lived in Riyadh? **A:** No. A few years ago, I **was living** in Dubai.

**Q:** What were you doing in Dubai? **A:** I was working at a hotel.

We use the past progressive with *always* to describe a repeated or annoying action.

My neighbor's son was always getting into trouble when he was younger.

We use the past progressive to describe a long action that is interrupted by a short action.

I was working on my computer when suddenly the power went out.

We use the past progressive to describe two actions that were happening at the same time.

While I was studying, my brother was watching TV.

#### 1 Listen and Discuss

In pairs, tell each other five things you expect a hotel to have. Then read about these four unusual hotels. Share with each other how each hotel is different from what you expected.

## Jules' Undersea Lodge Florida, USA

Undoubtedly, most people have never been to a hotel like Jules' Undersea Lodge before. This extremely unusual hotel, located in Key Largo, Florida, is on the ocean floor! Guests scuba dive to the hotel's one unit, which is over 19 feet (six meters) below the surface. The unit includes two bedrooms, a television, and 50-inch (107-centimeter) circular windows that offer views of passing sea life.

## Capsule hotels Throughout Japan

In recent years, capsule hotels have gained widespread popularity in Japan. Capsule hotels are hotels in which guests stay in a small sleeping space that is just big enough for a bed. There is so little room that some people can scarcely sit up in these capsules. However, in expensive cities, capsule hotels offer a relatively inexpensive alternative to more traditional hotels.

## Ariau Amazon Towers Hotel Manaus, Brazil

Ariau Amazon Towers Hotel in Manaus, Brazil, is the world's largest commercial tree house. Amazingly, Ariau's towers are built at the level of the rain forest treetops, about 72 feet (22 meters) in the air. The towers are linked together by four miles (six kilometers) of wooden catwalks. This very unusual setting gives guests the unique opportunity to experience the plant and animal life of the rain forest canopy while leaving the rain forest's ecosystem undisturbed.

#### The Kakslauttanen Hotel

#### Lapland, Finland

In the heart of Finnish Lapland, 155 miles (250 kilometers) north of the Arctic Circle, lies a truly magical place. The Kakslauttanen Hotel offers guests the

#### 3 Grammar 📓

#### **Adverbs of Degree**

Adverbs of degree tell us about the intensity of a verb, adjective, or other adverb. Some common adverbs of degree are:

absolutely	completely	hardly	quite	SO
almost	enough	just	rather	too
barely	extremely	nearly	scarcely	very

Adverbs of degree usually go before the main verb they modify.

I've **almost** finished packing. I **nearly** missed my flight.

Adverbs of degree usually go before the adjective or adverb they modify.

The travel agent was **extremely** helpful. He read the map **very** carefully.

When *enough* is used as an adverb of degree, it is placed after adjectives and adverbs.

Is your coffee hot **enough**? You are not speaking loudly **enough**.

#### **Sentence Adverbs**

Sentence adverbs modify an entire sentence, or a whole clause within a sentence. They indicate the attitude of the speaker. Some common sentence adverbs are:

actually	certainly	frankly*	obviously	probably
admittedly*	clearly	honestly*	officially*	undoubtedly
apparently	evidently	naturally*	presumably	(un)fortunately*

(\*) Some sentence adverbs usually go at the beginning of a sentence.

**Frankly**, I'm disappointed in the quality of this hotel.

Other sentence adverbs can go after the verb be, before simple tenses of other verbs, or after the auxiliary in a compound verb.

You are **obviously** having a good time.

He **certainly** spent a lot of money on this trip.

The flight has **undoubtedly** left by now.

- **A.** Rewrite each sentence to include the adverb of degree.
- We have recovered from our trip. (almost) We have almost recovered from our trip.

  - **4.** Sleeping on the train was uncomfortable. (rather)
  - **5.** We were exhausted by the end of our trip. (absolutely)

Passenger: Excuse me?

**Attendant:** Yes? Can I get something for you?

**Passenger:** No, but I wonder if I can ask you a guestion?

**Attendant:** Certainly.

**Passenger:** I see that there's an empty row near the front

**Attendant:** Unfortunately, that won't be possible. It's

against our policy for passengers to leave

their assigned seats on this airline.

**Passenger:** Well, that's a crummy policy. I don't get

it. Other airlines allow it. Why should

passengers be crammed together when there are open seats on the flight?

Attendant: Please try to understand. The problem is that if we gave you the seat, it wouldn't be fair to other

passengers who might also want the open seat.

Passenger: That's a drag. Especially since I requested a window seat at the front of the plane, and they put

me on the aisle near the back!

**Attendant:** Could I see your ticket please?

**Passenger:** Sure, why?

**Attendant:** Sir, the empty window seat at the front of the

plane is your seat! Your seat is number 3, not 33.

Passenger: Oh! Awesome!

#### 8 Reading

#### **Before Reading**

- 1. **Eco** means "related to the earth or environment." What do you think **ecotourism** means?
- 2. Read the passage and underline all the words and phrases that can help you understand what ecotourism means.

## **Ecotourism: See the World While Saving It**

Imagine vacationing in a place of stunning, natural beauty. Picture yourself relaxing on a pristine beach in Belize, exploring the desert on a camel in Dubai, or following lions and zebras in Kenya. Now imagine that while enjoying these experiences, you are also helping to preserve the environment, protect wildlife, and support local communities. Sound too good to be true? It isn't! Such vacations are part of the fastest growing trend in the travel industry. The trend is called ecotourism.

While ecotourism was almost unheard of before the 1990s, it has quickly become a multi-billion dollar industry. But what exactly *is* ecotourism? These are some of its characteristics:

- It involves travel to natural, often remote, destinations. These are often protected areas where development is limited.
- Ecotourism destinations focus on recycling, water conservation, and using renewable energy sources.
- It builds environmental awareness. As visitors explore an area, they also learn about it.
- It provides an economic incentive to preserve the environment and raises money to help protect it.
- It creates financial opportunities and jobs for the local population.

Costa Rica was one of the first ecotourism success stories. At one time, Costa Rica had the highest rate of deforestation in all of Latin America. However, since ecotourism, there has been a dramatic reduction in deforestation. Now, more than a quarter of Costa Rica's land is protected from development. Costa Rica is now the world's top ecotourism destination. Amazingly, this small country of four million people has about 1.5 million visitors per year.

Stacy Davison is one of the million-plus tourists who chose to visit Costa Rica this year. "We wanted to explore a country that was largely unspoiled by development. And, boy, did we get what we were looking for. We saw beautiful beaches, lush rain forest, and exotic wildlife." Stacy is especially enthusiastic about a wildlife refuge she and her husband visited during their trip. "Getting there took four hours by bus along an unpaved road. But it was so beautiful that it was worth it. We hiked the trails and took a tour through the rain forest canopy. Our guide showed us how to poke a stick into a termite nest to get a snack (They have a nutty flavor!), and how to use live leaf-cutter ants to create stitches for a cut. It was quite an amazing experience!"

Stacy also enjoyed knowing that the money she was spending on her vacation was being used in environmentally responsible ways. She stayed in locally-owned, environmentally-friendly hotels that grow their own fruits and vegetables, and use renewable sources of energy such as wind and solar power.

Undoubtedly, ecotourism plays a critical role in preserving the land in Costa Rica as well as in other ecotourism

destinations around the globe. At the same time, ecotourism provides visitors with a unique, unforgettable, and educational vacation. Basically, ecotourism is a win-win situation for both the tourists and the countries they visit.

#### 10 Writing 🗾

A. Decide on three places you would like to visit and say why you would like to visit them.

- 1. Read the article and find out the following:
  - Which place would the writer like to visit?
  - Why would he/she like to visit the place?
  - What would he/she like to do there?
  - Would you choose to go there?
- 2. Read the article again and answer the guestions.
  - How does it begin?
  - Are there paragraphs that provide only factual information?
  - Are there paragraphs that provide only personal views?
  - Are there paragraphs that combine factual information and personal views?
- **3.** What is your view as a reader?
  - Is there sufficient information about the place?
  - Does it answer your questions about the place?
  - Is the writer convincing about their feelings and views? Why? Why not?
- **4.** Which verb forms and tenses does the writer mostly use?
- **5.** Are there any passive forms? Why? Why not?

Ever since I saw a documentary about the land iguana and other strange creatures in the Galapagos, I have wanted to visit these isolated islands in the Pacific Ocean. The breathtaking landscapes and unusual animal life have drawn scientists, researchers, and conservationists to the islands for decades, but ecotourism has now made them a favorite destination for a lot of people.

The islands were formed by volcanic processes. There is still volcanic activity in the western part of the area as well as regular earthquakes. Due to the widely varied natural conditions, such as water temperatures that range from warm to moderately cool, as well as unique geological features, there is a significant diversity of marine and land species.

Diving, trekking, and hiking would be the most appealing way of seeing the islands and its inhabitants. I often dream of encountering the Galapagos giant tortoise and iguanas in their natural habitat.

Some researchers, who have chosen to make the Galapagos their home, have developed such a strong bond with the islands that they cannot tear themselves away for more than a couple of months at a time.

I might have been influenced by the enthusiastic accounts of dedicated conservationists or impressed by the unique images; the fact still remains, however, that a trip to the Galapagos is a life's dream that will hopefully come true some day.

#### **2** Reading

#### **Before Reading**

Read the passage and underline details that tell you how a computer virus and a biological virus are similar.

# Computer Viruses: A Headache for Humans

A computer virus is a computer program that has the ability to infect a computer without the user's permission, or even knowledge. There are more than a few similarities between computer viruses and human viruses.

Biological viruses enter the body through some kind of direct contact with the body and attach themselves to a host cell. The virus spreads, and the resulting damage can include pain, suffering, or even death. Similarly, computer viruses enter a host file in your computer when you open an infected email attachment. This virus then spreads, resulting in damage that can include deletion of files, emailing of all the addresses in the computer's email address book, a slowing down of the system, or even fatal damage to the hard drive.

If these viruses are so damaging, why do people allow them to infiltrate their computers? Because people are tricked into it. Viruses are sent attached to email messages. These emails use a variety of tricks to fool the reader into opening up the attachment. For example, some of these emails are designed to appeal to people's emotions. The "YOU HAVE WON" virus included an attachment titled "A-Gift-For-You. text.vbs." Users, thinking they had been sent a gift letter, opened the file, instantly releasing a virus and infecting their computer. Another common virus

disguised as a personal message is "Koob." "Koob" is spread through messages sent through social networking sites. The emails have subject lines like, "You look funny on our new video." When users try to download the "video," what they really get is a virus.

Another common way email users are manipulated into opening attachments that contain viruses is with messages that appear to come from businesses that people frequently use. These typically include auction sites, delivery services, and financial institutions. One such virus is the "UPS/FedEx Delivery Failure." This email comes with a message informing the user that a package he or she had supposedly sent could not be delivered. Users are told to click on the attachment for a refund. In reality, of course, the attachment unleashes a virus.

Ironically, one virus-spreading email was disguised to look like an email about protecting the user's computer from viruses! The "Microsoft Patch" virus was spread through an email that urged the user to download a software patch to prevent viruses. This email even included the Microsoft™ icon, which fooled many into believing the email was legitimate. In reality, the "patch" was a virus. This virus was forwarded by millions of people, resulting in the infection of computers around the world.

Do all you can to avoid exposing your computer to a virus. Think of the precautions you take against catching biological infections. You wash your hands and avoid contact with sick people. Extend the same care to your computer. Consider investing in antivirus software. And whatever you do, avoid opening emails with potentially infected files. You may just save your computer from contracting a nasty illness, and yourself from suffering a terrible headache.

#### 3 Grammar

#### **Direct and Indirect Objects**

A direct object is a noun or pronoun that receives the action of a verb.

A direct object answers the question what or who.

John wrote **the poem**. John likes **his new teacher**.

An indirect object tells us to or for whom the action is done.

There must be a direct object for there to be an indirect object.

John wrote **the poem** for *his mother*. John read **the poem** to *the audience*.

If there is a preposition, the indirect object goes after the direct object.

She gave the remote control to me.

If there is no preposition, the indirect object goes before the direct object.

She gave **me** the remote control.

When the direct object is a pronoun, the pronoun goes before the indirect object.

She gave it to **me**.

#### **To and For Before Indirect Objects**

Use to if the indirect object is receiving something. Use to with these verbs: bring, confess, give, hand, lend, offer, pass, pay, promise, read, sell, send, show, take, tell, and write.

Will you pass a pillow to me?

**Note:** The preposition *to* is not used when the indirect object comes before the direct object.

Will you pass **me** *a pillow*?

Use for if the indirect object is benefiting from some kind of help. Use for with these verbs: book, build, buy, cook, find, get, keep, leave, make, order, and reserve.

My parents bought a new TV for me.

**Note:** The preposition *for* is not used when the indirect object comes before the direct object.

His parents are buying **him** *a new TV* for his graduation.

With some verbs, the indirect object always follows the direct object, and the preposition *for* cannot be omitted: *answer*, *cash*, *change*, *close*, *fix*, *open*, *prepare*, *pronounce*, and *translate*.

Can you please translate the program for me?

A.	Complete the conversation with <i>for</i> or <i>to</i> .

	Alex: Omar:	What did Ahmed do? Well, he was angry at first. Then he demanded that Alan make a public statement on the air and promise that he would never do anything like that (8) him again.

#### 8 Reading

#### **Before Reading**

Television is popular around the world. Why do you think it is so popular? How much do you know about television?

## A Brief Overview of the History of Television

Television was not invented overnight by a single person. The work of many people over a number of decades contributed to its evolution.

In the early days, two distinct schools of thought in technology influenced different researchers and the course of their investigation. The first one was based on the technology of Paul Nipkow's rotating disks that supported a mechanical television system, and the second one on an electronic television system that used a cathode-ray tube developed independently by two inventors, Campbell-Swinton and Rosing.

Paul Nipkow (1860-1940), who invented the Nipkow disk in 1884, was the first person to discover the scanning principle that allowed small portions of an image to be analyzed and transmitted. However, it is unclear whether Nipkow actually built a working prototype of his television system.

Electronic television is based on the development of the cathode-ray tube, which can still be found in modern television sets. Philo Farnsworth (1906-1971)—was the first inventor to transmit a television image, a dollar sign, using the dissector tube which is the basis of all current electronic televisions. The American engineer started experimenting with electricity when he was 12, when he built an electric motor and produced an electric washing machine. He was still in high school when he conceived of his ideas for television.

A lot of people wrongly believe that color television is a recent idea. In actual fact, the earliest proposal for color television was patented in 1904, while in 1925 Zworykin filed his proposal for an all-electronic color television system. Commercial broadcasting, however, started in the early 50s, a quarter of a century later.

John Baird (1888–1946) is a researcher who is best remembered for inventing a mechanical television system, based on Nipkow's scanning disk idea. Actually, his work included a number of technological milestones in the history of television. He created the first televised pictures of objects in motion (1924), the first televised human face (1925), color television (1928), stereoscopic television, and television by infra-red light that were presented and demonstrated before the 1930s.

Vladimir Zworykin (1889-1982), the inventor of the iconoscope, a transmission device, as well as the kinescope, i.e. the cathode-ray tube, in 1929, was one of the first to demonstrate a television system with all the features of modern television, otherwise called "the tube." Most people in Britain that use the word *tube* to refer to television, fail to make the connection between the television set and the cathode-ray tube. Nor do people stop and think about the meaning of the word television, which refers to the transmission of images over a distance. In 1929 Zworykin became the director of electronic research at Radio Corporation of America (RCA), and was later promoted to vicepresident in 1947. Zworykin invented many devices including the the scintillation counter, a device for measuring radioactivity. He held more than eighty patents and received numerous awards for his work.

Louis W. Parker patented the "intercarrier sound system" in 1948, which is now used in all television receivers in the world. Without it, televisions would probably have been too costly for most people.

The plasma display monitor was invented in July 1964 by professors Bitzer and Slottow and their graduate student Robert Wilson. However, successful plasma television only became feasible later, after the

development of digital and other technologies. A factor that delayed the commercial development of plasma display was connected with LCD or liquid crystal displays which made flat screen television possible. This minimized one of the advantages of plasma television in terms of a flat screen with an improved image. So it has taken a lot longer for plasma display to become more widely acceptable and accessible. Until recently, a plasma television screen was regarded, to some extent, as a symbol of affluence or status along with other possessions.

Now a new development is affecting

communication and media further, namely that of web or Internet television. When Internet access is available along with adequate hardware, more and more viewers appear to be switching over to their laptops or desktops to watch films and other programs. Television sets are connected, allowing access to digital channels. The key word seems to be access. It is quick access and options that determine the popularity and, consequently, the commercial success of a medium. Television has so far been fairly well-established; it remains to be seen how digital technology will affect its evolution in the future.

#### A terrifying adventure on water

Moby Dick (1956), directed by John Huston and starring Gregory Peck, Richard Badehart and Leo Genn, is a TV fantasy film adapted from the bestselling novel by Herman Melville.

The story takes place in 19th century England on a whaling ship. The captain of the ship is Captain Ahab. Ahab has a fantastic story to tell about a "great white whale" which mutilated his body and almost killed him on a previous voyage. Now the captain leads his men back into the sea to take revenge. However, Ahab becomes so obsessed

with vengeance that he makes some very bad decisions.

The TV film takes us on a grand adventure over the waves as Captain Ahab and his crew seeks out the great sea mammal. As Ahab becomes more and more consumed by hatred, his doomed men are flung into dangerous situations. Does Captain Ahab eventually find the big whale? To find out you will have to

watch the film!

If you choose to watch one film version of the novel Moby Dick, you should choose this 1956 version. The acting is good, it is well-directed and the use of color and imagery is superb. I think it is far superior to more recently released TV film versions.

Everyone who read the book and those who enjoy adventure and tales of great battles between man and beast should see this TV film. I definitely recommend it as one of the best of our times. It is staggeringly good.

#### **Adjective Clauses and Relative Pronouns**

An adjective clause is a dependent clause that describes or gives information about the noun that comes before it.

The *language* that he/she speaks at home is Arabic.

Relative pronouns relate clauses to nouns in adjective clauses. Use the relative pronoun *who* for people, and *which* and *that* for things.

**Note:** The relative pronoun *that* can also be used when talking about people in general. However, when a particular person is being referred to, *who* is preferred.

#### **Relative Pronouns as Subjects of Adjective Clauses**

Relative pronouns can be the subject of an adjective clause. Relative pronouns that are followed by a verb are subject pronouns. Subject pronouns must always be included.

I am someone **who** loves watching guiz shows on TV.

#### **Relative Pronouns as Objects of Adjective Clauses**

Relative pronouns can also be the object of an adjective clause. Relative pronouns that are followed by a noun or pronoun are object pronouns. Object pronouns can be omitted.

English is a language (that) many people find easy to learn.

**Note:** Whom is considered more correct than who when used as the object of an adjective clause. However, whom is very formal. In casual speech, either who is used or the relative pronoun is simply left out.

#### **The Subjunctive**

We use the subjunctive to stress the importance or urgency of an action. The subjunctive uses the base form of a verb.

The manager insisted that he work late.

It is important that you **be** at the meeting.

The subjunctive is used with certain verbs and expressions, like the following:

ask request it is essential demand require it is imperative insist suggest it is important recommend urge it is necessary

The subjunctive follows the sentence pattern: verb or expression + that + subject + (not) base verb

It is essential that you dress appropriately.

She **asked** that we **not be** late.

#### I'd Like You + Infinitive / I Want You + Infinitive

Two common phrases used to express a desire that someone do something are *I'd like you* + infinitive and *I want you* + infinitive.

# 8 Reading

**Before Reading** 

Read the passages and make a list of the unusual jobs.

# You Do What for a Living?

When you were a kid, what did you want to be when you grew up? Perhaps a doctor, a teacher, or a firefighter? You probably didn't consider becoming a greeting card writer or a snow researcher (a person who collects ice crystals in snow to analyze the effect of pollution on an area of snowfall). Yet thousands of people around the world earn a living performing unusual jobs that most people have never even heard of.

Take Lily Martinez, for example. She has a job that girls around the world would dream about doing—if they only knew about it! Martinez is a doll fashion designer. She remembers, "As a girl, I would design one-of-a-kind outfits for my dolls." Her work is very similar to the work of regular fashion designers. She analyzes fashion trends, chooses fabrics, draws design sketches, and keeps a close eye on the styles of Paris and New York. Only she does all this to create clothing for 11 ½-inch (29-centimeter) dolls!

Do you have an artistic flair and an interest in science? Do you have a strong sense of taste, smell, and imagination? Then you might make an ideal flavorist. A flavorist is a person who creates natural and artificial flavorings that go into foods. Their work entails first identifying the individual chemicals found in nature. Then they recreate the flavors using different chemical combinations. Such manufactured flavors often last longer, have a stronger flavor, and smell better than flavors found in nature. These flavors can also avoid the allergens sometimes contained in natural flavors.

According to Carol Militescu, a senior flavorist, there is not one single way to create a flavor. "Different chemical combinations can make the same flavor. You might think the flavors are identical, but how you put the chemicals together makes them very different." Militescu says that to be a successful flavorist, it is essential that you "think outside the box."

But perhaps you would prefer a job working with animals? If so, you might consider a career as an elephant pedicurist. It may sound silly, but keeping elephants' nails clean and trim is critical to their health. Like human nails, elephant nails grow continuously. Elephants in the wild wear down their nails naturally, but captive elephants have fewer opportunities to roam. Elephant pedicurists scrape the bottom of the elephants' feet to get rid of calluses, dirt, and embedded rocks that can cause infection. They also trim, file, and shape the elephants' nails.

Mike Havward, the elephant pedicurist for the Ringling Bros. and Barnum & Bailey Circus®, loves his job. He gives pedicures to his twelve elephants every five weeks. The elephants generally cooperate with Hayward, waiting patiently through the two-hour process. Says Hayward, "It's almost like not going to work because the elephants are like my family."

So the next time you mull over your future career path, you might want to consider some non-traditional career options. After all, there just may be a new flavor waiting to be discovered, or an elephant whose feet will benefit from your expert care.

#### **After Reading**

Answer the questions.

- 1. What is Lily Martinez's job?
- 2. What are some of her responsibilities?
- 3. Describe what a flavorist does.

# The Job of an Arborist

Although my parents would like me to become a doctor or a lawyer, I am interested in a very different

kind of job. I would like to be an arborist, a sort of doctor for trees. To become an arborist, it is essential that you have a related bachelor's degree, for example in forestry,

as the more you know about trees the better you will be able to do what is expected of you.

Arborists are hired by individuals or organizations to keep trees healthy and attractive. They fertilize, prune, plant, and cure trees. In other words, they are a kind of official "tree carer." They are considered experts in their field. For this reason, they need to attend workshops and seminars throughout their career in order to keep up with developments.

I think it's perfect for me. I am interested in working in nature and taking care of things. I like trees. I am patient, methodical, and hard working. Finally, given current trends towards greener alternatives, I think there will be plenty of work for arborists in the future, so unemployment will not be a problem.

# 2 Pair Work

With a partner, create three more questions and answers to add to the quiz. Ask your classmates the questions and analyze their responses. How green is your class?

# 3 Grammar 📜

#### **Gerunds After Verbs**

Gerunds are the -ing form of a verb. They act like nouns and answer the guestion what.

I recommend **turning off** the lights when you leave the room.

Our class enjoys learning about ways to help the environment.

We use gerunds after certain verbs, such as:

advise	enjoy	intend	quit
begin	finish	keep	recommend
can't stand	go	like	start
consider	hate	love	stop
continue	imagine	prefer	suggest

#### **Infinitives After Verbs**

An infinitive is to + the base form of a verb. Like gerunds, infinitives act like nouns and answer the question what.

Don't forget **to reuse** that plastic container.

Do they intend to buy a hybrid car?

We use infinitives after certain verbs, such as:

agree	continue	intend	offer	start
ask*	decide	learn	plan	try
attempt	expect*	like	prefer	want*
begin	forget	love	promise	
can't stand	hate	need*	remember	

<sup>\*</sup>These verbs can be followed by an object before the infinitive.

They want to plant a garden. / They want us to plant a garden.

- **A.** Circle the correct verb forms. Sometimes both the gerund and the infinitive are possible.
  - Do you want (1. having / to have) a positive impact on the environment? I suggest (2. giving / to give) these steps a try:
  - Do you hate (3. throwing / to throw) away old clothes in the garbage? Consider (4. giving / to give) clothes that no longer fit you to other people who can wear them.
  - Quit (5. using / to use) disposable batteries. Begin (6. using / to use) rechargeable batteries.
  - Learn (7. buying / to buy) products with less packaging. Attempt (8. buying / to buy) large containers of water, juice, and soda instead of individual serving-size containers.
  - Learn (9. avoiding / to avoid) creating trash whenever possible. For example, when ordering food, avoid (10. taking / to take) any unnecessary utensils and napkins.
  - Start (11. making / to make) a shopping list before you go shopping. This will help you stop (12. buying / to buy) things you don't need on impulse.
  - Keep (13. reusing / to reuse) your supermarket bags.

- **B.** Answer the questions with complete sentences. Then discuss your answers.
  - 1. Do you think cars will stop running on gas in the near future?

### 4 Conversation 4

Jasim: That was a great garden barbecue! But

there are soda cans everywhere. I'll help you clean up. Where do you keep your

recycling bins?

**Ibrahim:** Nowhere. We don't recycle. Jasim: You don't recycle! Why not?

**Ibrahim:** I don't know. It's just always seemed

like it would be a hassle.

Jasim: Don't you think it would be a good

idea to make the effort?

**Ibrahim:** I guess. I do feel kind of guilty about

it. But then again, does it really make

that much of a difference?

Jasim: Are you kidding? Recycling reduces

> energy consumption, lessens air and water pollution, and saves landfill

space. It's a no-brainer.

**Ibrahim:** I just don't have the patience. It seems

like a lot of extra work. It's so much easier to just chuck everything in the garbage than to sort it by material for recycling.

Jasim: That's a lame excuse. Recycling is

a piece of cake. It becomes automatic

before you know it.

**Ibrahim:** I suppose you're right. OK, OK. I'll start

to recycle.

Jasim: Great! Hey, why are you throwing that

can in the garbage?

**Ibrahim:** Whoops! Old habits are hard to break!

# 8 Reading

#### **Before Reading**

Read the passage and underline ways that your country can replace utilities such as electricity, natural gas, and water from the local supply systems.

Imagine heating your home without relying on the local power plant. Wouldn't it feel good to meet your need for electricity without harming the environment? For a growing number of people, these ideas have become reality. Out of concern for the environment and a desire for self-reliance, these people have made the bold decision to live off the grid.

What exactly is "the grid"? The grid, short for "the power grid," is the linked system that supplies electricity to most homes and buildings in developed nations. Homes that are off the grid are not hooked up to the local power supply. Instead, they produce all of the energy they consume. As a result, people living off the grid avoid the environmental and financial costs that come with on-grid living.

The key to getting off the grid is replacing electricity supplied by a power plant with a renewable energy

source, like wind or solar power. Buildings that use solar power have solar panels on the roof or near the building. When the sun's light hits the panels, the panels collect the energy. Wind power is collected by turbines, also known as windmills. When the wind blows, the blades move, producing energy which is turned into electricity by a generator.

Some people go even further off the grid. In addition to setting up a renewable energy source, they also have an independent source of water. They dig wells to access ground water or use a cistern, a type of tank, to collect rainwater. Those most committed to living off the grid may even lack garbage service. These people generally live a life that creates very little waste, growing their own organic fruits and vegetables, and raising chickens and goats for eggs and milk. By avoiding the consumption of packaged foods, they greatly reduce paper and plastic waste.

As challenging as it may be to live off the grid, most off-gridders feel that the benefits far outweigh the difficulties. Jorge and Ella Alvarez, off-gridders in Northern Arizona say, "We love being off-grid. It's definitely hard work, but it puts everything in life into perspective. It's surprising to find just how much you can do without. Many people think we have a harsh and depressing lifestyle. Nothing could be further from the truth. We see living off the grid as a gift that has allowed us to be more in touch with nature and each other."

This view is shared by Wendy Johnston, a mother of three, living off the grid with her family in Ontario, Canada. Wendy recalls, "In the house I grew up in, we would leave lights on all day, the thermostat up at night, and water running without a second thought. I wanted my children to be raised with more respect for the environment and an awareness of the impact that they have on it. My children don't take energy for granted. I love the fact that they are learning how to take care of the earth while, at the same time, learning to be self-sufficient."

Wendy admits that living off the grid has its difficulties. For example, the Johnston's power usually goes down a few times a year. However, Wendy reflects, "The funny thing is that these often turn out to be some of our best times as a family. The power outages have an unexpected way of bringing us closer together. We read books and play games by candlelight, or we get together and tell stories."

Living off the grid entails sacrifices, and is certainly not for everyone. But for the thousands of people who have made this bold choice, life off the grid is filled with rewards that can't be matched by the conveniences and luxuries of life on the grid.

### Going Green

I realized how sensible "going green" was when I started noticing the amount of waste accumulated from all the packaging. We're a family of three and we manage to accumulate a bagful of recyclable waste every day. We are careful to use a special disposal unit for recyclable materials, but we are not sure it is always effective. Is it actually recycled?

We decided to search for options. We found out that there were many stores near the central market that sold goods by weight out of large canisters or burlap bags. Rice, beans, flour, sugar, oil, butter, cheese, and a lot more are available off the counter, free of packaging. When we compared prices, we decided to never look back.

A lot of time, money, and resources are invested in packaging as a way of making the product more attractive for consumers. Glossy wrappers, beautifully designed boxes, vacuum wrapped coffee, plastic containers, colorful lids, and a lot more, have a magnetic effect on buyers. We, on the other hand, have to label and fill our own containers, before we can put away our shopping. But, we make better use of cupboard space, spend a lot less, and protect the environment. You should try it!

- B. 1. Write a letter to the editor of your local newspaper. Complain about your neighborhood and suggest how it could 'go greener.' With a partner, discuss the items below:

# 2 Reading

#### **Before Reading**

- 1. What color is the room you are in now? How does the color make you feel?
- 2. Have you ever painted a room? If so, what color did you choose and why?

I want you to imagine yourself in a room painted a light blue color. Now, imagine yourself in a vibrant red room. Do you think you would feel differently in each of these rooms? If you are like most people, you would feel calmer in the blue room and more energized in the red room. Why is this? Psychological studies have found that different colors can have different effects on mood and behavior.

People have a tendency to associate colors with where these colors appear in nature. So, for example, without realizing it we associate soft shades of blue with the sky and sea. These associations make blue a calming color for most people. Asuka Obata runs a spa in Kyoto, Japan. All the walls of the salon are blue. Obata says, "It is essential that we create a sense of peace and tranquility. The color blue helps us achieve this."

Red, however, is associated with fire and blood. So red is also associated with danger and vitality. The color red has even been shown to raise blood pressure! Adrian Vilas of Cordoba, Argentina, painted his office red. He says, "I like being surrounded by a color that gives me energy and inspiration." On the other hand, have you ever wondered why traffic lights and stop signs utilize the color red? To warn of danger, of course.

While we all share natural associations with certain colors, the same color may have a very different meaning to people of two different cultures.

The colors black and white provide a good example of how people can have different cultural responses to colors. In many cultures, black symbolizes death and mourning, and so black is the traditional color worn to funerals. However, in Asia it is not black that represents mourning, but white. So in Asia, white is the color people usually wear when they attend funerals.

In most other cultures, far from being associated with funerals, white represents purity, innocence, and goodness. For this reason, white is traditionally worn by brides in these cultures. However, in China, since white is the color of mourning, it is important that a bride *not* wear white. Instead, the traditional color worn by a bride in China is red. In Chinese culture, red represents happiness and good luck, and so Chinese celebrations are full of red. During the Chinese New Year, people prefer wearing red to any other color and older family members give money in red envelopes to younger members of the family.

Clearly the way we respond to color is a complicated business. You may think you are choosing a red shirt just because you like the color. But the truth is, you are probably responding to it based on what your brain, the environment, and your culture tell you about the color!

#### **Writing Prompt**

Write an expository essay about what different colors, symbols, customs, or gestures mean in your culture. Say what you think this shows about your culture. Include grammar points from Units 4, 5, and 6.

In an expository essay, the writer explains, describes, or gives information about a subject.

#### **Write Your Expository Essay**

- **1.** Decide whether you will write about colors, symbols, customs, or gestures in your culture. What do you think these show about your culture? This will be your topic sentence.
- **2.** Use a chart to organize your ideas. Write your topic sentence in the center circle. Then write ideas which support this topic sentence in the surrounding circles.
- **3.** Write a draft of your expository essay.
- **4.** Have a partner read and comment on your draft. Use your partner's comments and suggestions to revise your essay.

#### Developing Your Writing: Body Paragraphs that Support the Topic Sentence

The paragraphs of an essay between the introduction and conclusion are called the *body* of the essay. Each body paragraph must have one main idea, as well as examples, definitions, facts, or statistics which support that main idea. The main idea of each body paragraph must relate to and support the topic sentence in the introduction.

As you write the body of your essay, ask yourself:

- Does each paragraph have one main idea?
- Is this main idea supported by examples, definitions, facts, and/or statistics?
- Does each paragraph support the topic sentence in the introduction?

#### Customs and Gestures in Korean Culture

To understand the perspective of Korean people, it is important to understand their customs and gestures. I believe that Korean customs and gestures show that the Korean culture is quite traditional and conservative.

One aspect of Korean culture that is traditional and conservative is greeting people. Korean people usually bow when they meet one another. When Koreans are introduced to someone for the first time, they generally do not smile. Smiling is reserved for informal occasions. Koreans also consider staring impolite. We prefer to make only brief eye contact. When meeting a Korean person, I suggest you avoid looking into his/her eyes for more than a moment or two...
